SUMMARY

I like solving problems, whether that means writing a Power Automate flow to save an office hours of manual work, troubleshooting IT and equipment issues, or figuring out how to build something with my hands. I bring a practical, get-it-done mindset to everything I work on.

EXPERIENCE

Simulation Technician (Work-Study) — UTRGV School of Nursing Sep 2024 – May 2026

- Managed and maintained patient simulation equipment, diagnosing malfunctions and coordinating directly with manufacturers for repairs, replacement parts, and service issues.
- Ran and supported simulation sessions, ensuring systems, scenarios, and lab spaces were ready and functional for scheduled use.
- Handled clerical and administrative operations for the simulation department, including answering incoming calls and receiving and logging mail and packages.
- Owned device inventory management for the office and supply inventory management for simulation labs, keeping equipment and materials tracked and stocked.
- Provided after-hours coverage of simulation laboratories, overseeing outside-time simulation activities and lab security.
- Staffed department events, managing large volumes of visiting students, faculty, and guests.
- Contributed to planning for a full simulation laboratory remodel scheduled for June 2026.

Web Development Assistant (Work-Study) — UTRGV School of Nursing Sep 2022 – Sep 2024

- Diagnosed and resolved computer hardware and software issues for department staff.
- Managed, updated, and revamped the department website, improving design and keeping content current.
- Owned device inventory management for the office and supply inventory management, keeping equipment and materials tracked and stocked.
- Built automation workflows using Microsoft Power Automate to streamline repetitive office tasks and reduce manual workload.

EDUCATION

B.S. Computer Science — University of Texas Rio Grande Valley
Expected Dec 2026

B.S. Mechanical Engineering — University of Texas Rio Grande Valley
Expected 2029

SKILLS

Web Development: HTML5, CSS3, JavaScript, Website Maintenance

IT & Office Automation: IT Support & Troubleshooting, Microsoft Office Suite, Microsoft Power Automate, Workflow Automation

Engineering & Design: Mechanical Engineering Fundamentals, Applied Mathematics, CAD Software, 3D Printing

Other: Problem Solving, Inventory Management, Event Staffing, Time Management
